PROFESSIONAL SUMMARY

Software Engineer and Full Stack Developer with hands-on experience building scalable web and mobile applications across HRMS, Recruitment, CRM, QA Management, and AI-powered platforms. Proficient in React.js, Next.js, Node.js, Express.js, PostgreSQL, MongoDB, and React Native, with experience delivering production-grade solutions from concept to deployment. Passionate about solving complex business problems through technology, system design, and AI-driven innovation.

WORK EXPERIENCE

Software Engineer, Lumos Logic India LLP — Jul 2026 – Present

- Develop and maintain enterprise-grade SaaS and AI-powered applications using React.js, Next.js, Node.js, PostgreSQL, MongoDB, and React Native.
- Design and implement secure REST APIs, authentication systems, role-based access control (RBAC), and database architectures for enterprise applications.
- Integrate AI-powered services and automation workflows to enhance business processes, user experiences, and operational efficiency.
- Manage end-to-end application deployment, cloud infrastructure, domain configurations, SSL setup, and production releases across Hostinger VPS, Firebase, Google Cloud Run, Render, and Vercel.
- Collaborate with QA teams and stakeholders to analyze requirements, resolve production issues, and deliver high-quality software solutions.
- Participate in system design, feature planning, testing, deployment, and continuous product enhancement throughout the software development lifecycle.
- Ensure application performance, security, scalability, and maintainability across multiple SaaS and AI-powered platforms.

Software Engineer Intern, Lumos Logic India LLP — Jan 2026 – Jun 2026

- Contributed to the development of full-stack web applications using React.js, Node.js, Express.js, PostgreSQL, and MongoDB.
- Assisted in building business modules, API integrations, responsive interfaces, and database-driven features.
- Participated in software testing, debugging, deployment activities, and feature enhancements.
- Collaborated with development and QA teams throughout the software development lifecycle.

PROJECTS

HRMS – Lumos Logic | https://hrms.lumoslogic.com/

- Enterprise Human Resource Management System serving attendance, payroll, onboarding, offboarding, biometric integration, document management, leave management, and organizational operations.
- Developed modules for employee, department, branch, role, and payroll management.
- Implemented secure authentication, role-based permissions, and biometric attendance synchronization.

Tech: React.js, Node.js, Express.js, PostgreSQL, JWT, Cloudinary, Hostinger VPS

Lumos HRMS Mobile App | https://play.google.com/store/apps/details?id=com.lumoslogic.hrms

- Mobile application providing HRMS functionality including attendance, leave requests, employee profile management, and notifications.
- Built responsive mobile workflows integrated with the HRMS backend.

Tech: React Native, Expo, Node.js, PostgreSQL

DevTracker – QA Management Platform | https://devtracker.lumoslogic.com/

- AI-powered bug tracking and project management system designed to replace traditional spreadsheet-based QA workflows.
- Enables QA teams to report bugs, assign developers, set priorities, and track resolution status.
- Integrated AI-assisted bug generation and developer prompt generation for faster issue resolution.

Tech: React.js, Node.js, Express.js, Supabase, Cloudinary, JWT, Hostinger

RecruitX Meet | https://meet.recruitx-ai.com/

- AI-powered interview automation platform with Google Meet integration.
- Supports automated scheduling, meeting creation, recording, transcription, scoring, and candidate communication.
- Generates interview insights and candidate evaluation reports using AI.

Tech: Next.js, Python, Recall AI, ElevenLabs, Deepgram, GPT-4o Mini, Convex, Cloudinary

DocuFlow AI | https://aidocs.lumoslogic.com/

- AI-powered document generation platform for invoices, tax documents, Form 16, project reports, and business documentation.
- Supports branding customization, e-signatures, document locking, and AI-assisted editing.

Tech: React.js, Python, Convex, Cloudinary, Hostinger

RecruitFlow | https://flow.recruitx-ai.com/

- End-to-end recruitment pipeline management platform connecting clients, recruiters, and candidates.
- Supports job posting, candidate submission, interview rounds, feedback tracking, and hiring workflows.

Tech: Next.js, Convex, JWT, Cloudinary, Hostinger

RecruitX CRM | https://crm.recruitx-ai.com/

- AI voice interviewing platform conducting automated candidate screening through phone calls.
- Provides call scheduling, transcript generation, AI scoring, and candidate communication workflows.
- Tech: Next.js, Python, Bolna AI, ElevenLabs, Deepgram, GPT-4o Mini, Convex, Firebase Hosting

AgroSense – Smart Agriculture Management System | Jan 2025 – May 2025 (github.com/AgroSence/AgroSence)

- Led full-stack development of a farmer-to-buyer marketplace eliminating middlemen
- Built REST APIs, database schema, and responsive UI using MERN stack
- Integrated AI chatbot for real-time farming assistance and government schemes
- Optimized system architecture using MongoDB Atlas and modular backend design

Tech: React.js, Node.js, Express.js, MongoDB, Bootstrap, Cloudinary

ConnectVista – Service Marketplace Platform | Nov 2025 – March 2026 (github.com/DHRUV-SHERE/ConnectVista)

- Built a full-stack service marketplace connecting customers with verified service providers, featuring JWT-based auth and role-based authorization for multi-user types (customers, providers, admins).
- Engineered real-time messaging and push notifications using Socket.io; implemented provider onboarding, booking lifecycle, and subscription management systems.
- Developed a trust-driven rating and review engine and modular backend with scalable, service-oriented architecture.

Tech: React.js (Vite), Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS

PashuMitra – Smart Veterinary Healthcare System | Jul 2025 – Nov 2025 (github.com/ProjectSGH/PashuMitra)

- Designed a multi-role healthcare platform (farmers, veterinarians, medical stores, transport) with real-time consultation workflows and Socket.io notifications.
- Built full-stack features enabling interaction with doctors and medical stores
- Implemented real-time communication and notification system using Socket.io
- Designed role-based architecture for Farmers, Doctors, Stores, and Admin

Tech: React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, React Native, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST API Development, JWT Authentication, Role-Based Access Control (RBAC), Socket.io
- **Database:** MongoDB, PostgreSQL, MySQL
- **AI & Automation :** LLM Integration, Prompt Engineering, OpenAI API, Deepgram, ElevenLabs, Recall AI, AI Workflow Automation
- **Tools & Platforms:** Git, GitHub, Postman, Cloudinary, Convex, Firebase, Expo
- **Cloud & Development :** Hostinger VPS, Google Cloud Run, Firebase Hosting, Vercel, Render, Domain & SSL Configuration, Play Store Publishing
- **Core Concepts:** System Design, Software Engineering, OOP, DBMS, API Integration, Web Security, SDLC, Performance Optimization

EDUCATION

Bachelor of Technology in Information Technology **2023-2026**
U.V. Patel College of Engineering - Ganpat University, Mehsana | 8.30/10 CGPA

Diploma in Information Technology **2020-2023**
Government Polytechnic College, Ahmedabad | 8.19/10 CGPA

KEY HIGHLIGHTS

- Software Engineer at Lumos Logic India LLP
- Built and deployed 10+ production-grade web, mobile, and AI-powered applications
- Developed HRMS, Recruitment, CRM, QA Management, and AI-powered SaaS products
- Led Smart India Hackathon (SIH) team selected in internal hackathon
- Experience with AI integrations including OpenAI, Deepgram, ElevenLabs, Recall AI, and Bolna
- Full Stack Development using React, Next.js, Node.js, Express.js, PostgreSQL, MongoDB, and React Native
